

The challenges of applying differentiated education in Greek Schools for students with disabilities

Panagiota Marinopoulou
PhD Candidate at the University of Alicante

INTRODUCTION

This presentation explores the role of differentiated instruction applied in Greek schools, focusing on students with disabilities. Differentiated education is an instructional approach that promotes teaching methods and learning experiences to meet the diverse needs of all students. In Greek schools, this approach is very important in order to support students with disabilities, ensuring they receive an equitable education.

Research problem

- Limited resources and training for teachers to use effectively in the classroom the differentiated strategies.
- Resistance to change from traditional teaching methods.
- In many cases there was an addressing of a wide range of disabilities within a single classroom setting.

Areas of research

The study focuses on students attending in Greek schools.

Aim of the research

- To examine how differentiated education is applied in Greek schools for students with disabilities.
- To identify the benefits and improvements in learning outcomes for these students.
- To provide insights into effective strategies for implementing differentiated education.

Research methodology

- The study employs qualitative and quantitative research methods, including surveys, interviews, and case studies. Data is collected from various educational settings to understand the impact of applying a variety of methods according to differentiated instruction rules into classroom.

Results

- The findings indicate that there was improved student engagement and participation in classroom activities by using differentiated education for the new knowledge.
- Enhanced academic performance and social skills among students with disabilities.
- Participants reported improved communication skills, stronger confidence with better academic outcomes.

Conclusion

- Differentiated education in Greek schools offers significant benefits for students with disabilities, promoting inclusivity and academic success.
- Future efforts should focus on overcoming challenges and expanding the use of differentiated strategies to reach more students.
